

**The vaccinator village –
working together
to optimize patient encounters**

Judith A. Melin, MA, MD, FACP

Massachusetts Adult Immunization
Conference

25 April 2017

- *I, Judith Melin, have been asked to disclose any significant relationships with commercial entities that are either providing financial support for this program or whose products or services are mentioned during my presentations.*

- *I have no relationships to disclose*
- *I may discuss the use of vaccines in a manner not approved by the U.S. Food and Drug Administration, but in accordance with ACIP recommendations.*

CME Disclosure

- Now more than ever, patients have choices

about where to get their vaccinations:
Physician's office, local board of health,
retail pharmacy, employer, etc.

- What challenges and opportunities does this present to these providers?

Panelists will discuss challenges and opportunities for communication, collaboration and systems to improve patient vaccination experience

Description

Identify opportunities
to optimize adult
vaccination encounters
through provider-
based systems and
collaboration with
different vaccinators

Objective

To get a vaccine?

- 1 vaccine
- 2 people (1 to get the vaccine, 1 to give the vaccine)

What does it take ...

Is that really all it takes?

In vaccination?

Where does each of us
fit in that continuum?

What are the
roles ...

How do I

- Get a vaccine?
- Give a vaccine?
- Know what vaccine to get?
- Know what vaccine she needs?
- Know what vaccine he had?
- Know if they're vaccine protected to work?

The Village's roles

...

To 'get' a vaccine?

What does it
take...

Timing – When is the vaccine to be received?

Age based

Frequency based

Outbreak prevention

Considerations

Location – Where could the vaccine be received?

Office

Hospital

Health Department

Senior Center

Workplace

Pharmacy

Home

Considerations

Information – Where is the information needed for the process?

- EHR
- Paper records
- Workplace records
- Pediatric records
- Emergency Departments

Considerations

Information
sharing

Prompting

Whom

By whom?

When

How

More considerations ...

Identify
opportunities to
optimize adult
vaccination
encounters through
provider-based
systems and
collaboration with
different vaccinators

Objective

**The vaccinator village –
working together
to optimize patient encounters**
